## Goodbye Electrons, Hello Photons

SRI is a part of the  
Heterogeneous Adaptively

Produced Photonic Interfaces (HAPPI) program, which aims to advance the capability of circuits that transmit information using light (photons) rather than electricity (electrons). “SRI’s Boulder facility has incredible expertise in designing and testing PICs,” says SRI senior research scientist David Hill.

## Clinical Trial of High-Dose Naloxone

An SRI team has developed a highly concentrated naloxone formulation that provides a rapid and sustained reversal of opioid overdose. The SRI formulation delivers 10 times more naloxone per milliliter than current marketed products and is optimized for systemic availability and shelf stability.

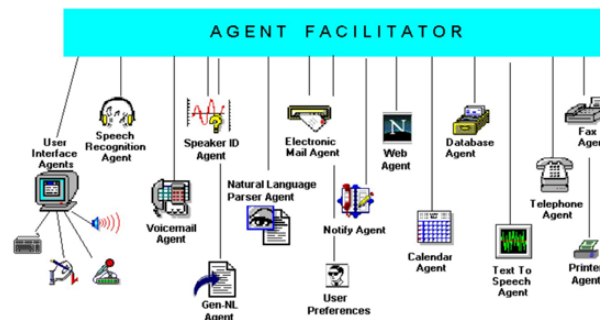

## Robot Teams that Chat with Humans

Development of next-generation robots that can converse with humans and each other will be based on large language models

(LLMs) responsible for generative artificial intelligence (AI) applications. “It’s going to change how we work with machines.”

## Agentic Computing

Adam Cheyer describes how “agentic computing” has become a central focus in discussions about the future of generative AI. While the latest wave of interest in agentic systems may be new to some, SRI International has a deep and pioneering history in exactly this space. This article looks at Agentic Computing of the past and future.

## Where are They Now?

Craig Heinselman was recently awarded the Beynon Medal by the European Incoherent Scatter Scientific Association, which he led after leaving SRI to join the University of Alaska Fairbanks Geophysical Institute as a research professor. Craig received the honor for his work leading a six-nation organization that builds and operates ionospheric research facilities in northern Fenno-Scandinavia.

## Congressman Gerry Connolly Dies

Gerry Connolly, SRI alumni and distinguished U.S. Congressman, died in May while in office and as ranking member of the House Oversight Committee. Don Nielson summarizes his accomplishments.

---

## In Memoriam

**We note the passing of:** Edward McIntosh Acton, Richard Adamo, Gerald Edward Connolly, Earl Craighill, Oscar Fierschein, Edward McClung Thompson Jones, Thomas Joseph Logothetti, David Walker, Melvin Wright
